EXECUTIVE SUMMARY

The Department of Education (DOE) and the School Construction Authority (SCA) are proposing a \$17 billion capital plan for FY2025-2029. Through this Plan, we will continue the progress we have made in recent years in expanding and enhancing school infrastructure to meet the needs of New York City's future generations of school children. Although the City faces significant economic headwinds, this \$17 billion plan demonstrates the City's unwavering pledge to invest in New York City's Public Schools.

The FY2025-2029 Plan is organized to encompass efforts in four categories: Capacity, Healthy Schools, Capital Investment, and Mandated. This Five-Year Capital Plan will continue the City's long-term commitment of investing in the creation of new seats, not only in areas of current overcrowding and projected enrollment growth, but also to help schools comply with recent state legislation requiring smaller class sizes. Introducing the newly created Healthy Schools category will enable us to allocate funds strategically for promoting healthier school environments, advocating health and nutrition, and broadening opportunities for physical education. We will also continue to invest in our existing infrastructure via the Capital Investment category which provides better facilities for New York City's students, teachers, and staff. The Mandated category includes funding to meet requirements by local law, City agency mandates, and other required elements such as remediation and building code compliance projects, insurance, and emergency projects.

In prior Five-Year Capital Plans, we focused primarily on building new seats where we had identified a need for new capacity. However, while we continue to build and create new capacity, the City has recognized a multi-year decline in enrollment along with a declining birth rate, which has reduced the overall need for new capacity. As a result, we are now shifting our focus to provide targeted support to schools to achieve compliance with the state's class size legislation as well as to advance equity and excellence throughout the five boroughs. As such, we have combined the successful New Capacity program with the Class Size Reduction program from prior Plans to create a re-envisioned New Capacity program. This reimagined New Capacity program will equip us with more flexibility to promptly respond and provide support tailored to the specific needs of school communities throughout the city. Additionally, we will continue expanding successful key programs such as Facility Replacement, Capacity to Support the Removal of Temporary Structures, as well as the Early Learn program. By generating new capacity for all four programs, we will further increase equity throughout the system.

The creation of the new Healthy Schools category stands as a testament of our dedication to providing students with an environment that is not only conducive to learning, but also prioritizes their well-being and physical fitness. Within this category, we are committed to leading the way in pioneering methods for the construction and renovation of school buildings that support sustainability and energy efficiency. By doing so, we aim not only to meet the immediate needs of students, but also to set a benchmark for future developments in educational infrastructure. This visionary approach underscores our commitment to providing an enduring legacy of healthy, vibrant, and environmentally conscious learning spaces for generations to come.

New York City is faced with challenges to both achieve class size compliance and keep its aging infrastructure in a state of good repair. The demand for capital investment always exceeds the available funding, so capital needs must be prioritized to ensure the most critical issues are addressed first. Every year, the SCA conducts a thorough and in-depth assessment of our existing buildings. This evaluation serves as the foundation for prioritizing projects within our current building inventory, with the ultimate goal of providing facilities that are secure and conducive to learning.

The DOE/SCA is dedicated to developing and expanding comprehensive programs that are closely aligned with educational objectives and priorities. This integrated approach includes the improvement of bathroom facilities, increased accessibility for our buildings, augmentation of safety and security measures, and upgrades to school infrastructure that better supports digital learning — all with the overarching goal of preparing students for success in both college and professional careers.

The FY2025-2029 Capital Plan features the following proposed investments:

- **\$4.98 billion for Capacity.** The Capacity program includes five elements:
 - **\$4.13 billion for New Capacity** — funds new seats and helps alleviate existing overcrowding, responds to ongoing pockets of growth in certain neighborhoods, and supports schools in their effort to achieve compliance with the state class size law. In this proposed Plan, we have merged the New Capacity and Class Size Reduction programs into one. This consolidation is to recognize that both programs share a common objective: augmenting capacity and infusing fresh resources into schools, communities, and neighborhoods. By streamlining these efforts, we aim to develop finely tuned solutions to the unique demands of schools and communities, optimize their impact, deliver more comprehensive benefits, and reach more students in a timely manner. In addition, we have secured and will continue to seek opportunities to include new public-school facilities across the city within major, predominantly residential development rezoning projects in areas of existing or projected overcrowding.
 - **\$200 million for Capacity to Support Removal of Temporary Structures** — funds the expanded effort of building capacity to support the removal of temporary structures throughout the city. Building on the successful implementation of the Temporary Classroom Unit (TCU) removal program, we have extended this initiative to other temporary structures within our system, particularly targeting schools that might require additional support due to over-utilization. This investment reflects our continued commitment to reducing our reliance on temporary structures and providing educational environments that facilitate effective learning experiences for our students.
 - **\$50 million for Temporary Structure Removal/Playground Redevelopment** — funds the removal of temporary structures where schools no longer need those spaces. This program will also allow for the creation of brand-new playgrounds after the TCUs are removed, enhancing the outdoor recreational environment for our students.
 - **\$400 million for Facility Replacement** — funds the development of seats for schools that must be relocated during this Plan and aims to provide a seamless and uninterrupted learning environment for our students during the transitional period.
 - **\$200 million for Early Education** — funds our continued effort to incorporate the ACS Early Learn sites transferred into the DOE portfolio.

- **\$2.25 billion for Healthy Schools.** The Healthy Schools portion of this Plan is comprised of:
 - **\$1.40 billion for Electrification** — includes funding to support electrification of existing buildings, eliminate reliance on fossil fuels, and provide a cleaner and more sustainable environment. This pioneering program demonstrates the Adams Administration’s commitment towards ambitious sustainability objectives.
 - **\$350 million for Heating Plant Upgrades** — allocates funding to upgrade heating systems in existing school buildings where electrification is not the optimal option.

- **\$325 million for Physical Education Projects** – includes funding to modernize and expand our physical education facilities, including athletic fields, swimming pools, and playgrounds. Recognizing that physical education constitutes a critical component of comprehensive school instruction, this program represents an indispensable investment in the overall well-being of our students. By renovating and expanding our athletic infrastructure, we are not only providing students with state-of-the-art facilities, but are also creating an environment that encourages active participation in sports and physical activities.
- **\$180 million for Health & Nutrition Projects** – provides funding for the creation of unique educational spaces, such as learning gardens, with a special emphasis on health and nutrition. Under this program, funding is also included to extend the successful implementation of the Cafeteria Enhancement Experience initiative started in the prior Plan that transforms cafeterias into comfortable, pleasant, and attractive dining environments.
- **\$6.37 billion for Capital Investment.** The Capital Investment portion of this Plan includes two main categories:
 - **\$3.33 billion for the Capital Improvement Program (CIP)** – includes exterior and interior building upgrades and other necessary capital repairs to our buildings, such as life safety and security systems so that we maintain the highest standards of safety at school facilities for all students.
 - **\$2.88 billion for School Enhancement Projects** – strengthens educational opportunities for our students. This category funds technology enhancements, realignment of existing facilities to better suit instructional needs, bathroom upgrades, science labs, accessibility, the Innovative, Diverse, Equitable, Accessible (IDEAS) program, the Career and Technical Education (CTE) program, and other necessary improvements.
 - In addition, **\$161 million** has been allocated by Mayoral/Council sources for targeted investments at specific schools.
- **\$3.40 billion for Mandated Programs.** This program provides funding to meet requirements of local law, City agency mandates, and other required elements such as remediation, building code compliance, insurance, and emergency projects.

Public Review

The proposed FY2025-2029 Capital Plan will continue the public input process implemented since the FY2005-2009 Plan. During this process, a proposed Plan is released by November 1st. The public review period extends from November through January, during which time the DOE/SCA meets with Community Education Councils (CECs), Community Boards, City Council borough delegations, and other elected officials. An updated Plan incorporating the results of the meetings will be released by February 1st. The Panel for Educational Policy reviews the Plan and, if approved, it is forwarded to the Mayor and the City Council for review and approval as part of the City's annual budget adoption process in June.

In subsequent years, the DOE/SCA will release amendments to the Five-Year Capital Plan annually. The annual amendment process allows the DOE/SCA to reassess priorities and to account for shifts in enrollment, variations in housing growth, changes in building conditions, new educational initiatives, adjustments in the construction marketplace, and any impact from financial changes implemented by the City or State. This annual review has proven to be the most effective way to make the Capital Plan a living, working document that, within budgetary constraints, keeps pace with the needs of the educational system. This process provides increased transparency and results in expanded review and dialogue for stakeholders. All proposed amendments and original five-year capital plans are subject to this public review and City Council adoption.

CAPACITY

Introduction

The Capacity category encompasses all aspects of creating the seats necessary to allow for the expansion of our school system. This category provides the infrastructure necessary to continue advancing our goals of growth, sustainability, equity, and resilience. By building new facilities, the City will meet local enrollment demands, support effort to achieve class size mandates, strategically grow and replace buildings to meet future needs and eliminate our reliance on temporary structures.

Multi-year declines in public school enrollment and the city's birth rate have decreased the need for new capacity. At the same time, many of our schools are playing an important role in providing support to families seeking asylum, welcoming their children into our schools. These factors require a shift in our methodology to meet capacity needs in targeted areas of the city by addressing specific challenges faced at the school level. This change in our strategy is also necessary to support the schools that face challenges in meeting the class size mandate with their existing space. In light of the state class size law, the DOE and SCA have been diligently collaborating with stakeholders to conduct a comprehensive evaluation and assessment of the viability, effectiveness, and potential implications of the various strategies required for compliance, including around ensuring adequate space. The DOE has assembled a diverse Class Size Working Group, comprised of dedicated representatives from diverse backgrounds including parents, advocates, community leaders, educators, and elected officials. This collective effort aims to construct a robust toolkit, consisting of an array of resources and measures tailored to address the diverse needs of schools. Through this collaborative approach, we are working to equip schools with the necessary support and tools to effectively navigate the tradeoffs posed by the class size law, ensuring an optimal learning environment for all students, while prioritizing equity, as the law requires.

In order to respond to the changing needs of our city, we have strategically combined the New Capacity program and Class Size Reduction program to ensure we can react more swiftly to the need identified on a more localized level. This re-envisioned approach ensures that our response is not only prompt but also finely tuned to the unique demands of each situation, ultimately enhancing our ability to deliver effective support in a timely manner. By adapting to these changing circumstances, we will be able to advance equity across school districts by appropriately responding to the actual needs of our schools through the reinvented New Capacity program.

In alignment with the priorities of equity and excellence, in the FY2025-2029 Five-Year Capital Plan, the DOE and SCA continue to recognize the need to create new District 75 seats and to maximize inclusion opportunities in general education programs for students with disabilities who would otherwise need to enroll in District 75 programs. This funding will allow for the identification of new capacity that will meet District 75 demand and also promote inclusive educational models across the city.

In this Plan, we are extending our successful program of supporting the removal of TCUs to include other temporary structures to move closer to our goal of eliminating reliance on temporary structures. In many instances, these structures do not provide efficient educational programming space and this effort will offer the opportunity to rethink and reimagine a better usage of learning environments while generating additional seats.

In addition, funding will go towards the removal of these temporary structures as well as the construction of new playgrounds to improve outdoor recreational space available at schools.

The Facility Replacement program provides funding for replacement sites for schools that must vacate their current locations, largely due to lease terminations. These replacement schools will provide modern teaching and learning facilities.

In addition to the above capacity efforts, the DOE/SCA has allocated funding specifically to support fully incorporating the Early Learn portfolio that was transferred from ACS to DOE in the FY2020-2024 Plan.

The DOE/SCA continues to work with the Adams Administration on the City's historic effort to build "A Little

More Housing in Every Neighborhood," which aims to create an additional 100,000 homes for New Yorkers over the next decade. These significant efforts may lead to capacity needs. The DOE/SCA will continue collaborating with our partners in government on any land use proposal or other actions as part of the "City of Yes for Housing Opportunity" proposal, and will also work with City agencies to ensure that appropriate resources are in place to mitigate the impact of any resulting housing growth.

In addition to new construction, the DOE/SCA will continue to employ, wherever possible, two strategies undertaken in the prior Capital Plans to create new capacity — developing public/private partnerships and leasing sites. Public/private partnerships will be supported by the Educational Construction Fund (ECF). This development vehicle is focused on constructing mixed-use real estate projects which feature new school facilities. During prior Capital Plans, the DOE/SCA secured the opportunity to include new public-school facilities across the city within several major, predominantly residential, development projects undertaken by private developers in areas of existing or projected overcrowding. The partnerships with these developers allowed the DOE/SCA to provide new school facilities in areas of need with contributions of land or space by those developers. Continuing this practice, seats within developments are funded for either design or design and construction and include: Hudson Square and Hudson Yards in Manhattan, Greenpoint Landing in Brooklyn, and Halletts Point and Willets Point in Queens. Across the city, we will closely monitor the enrollment trend while continuing to seek opportunities to collaborate with developers and the City to create more seats.

Our second strategy is to expand efforts to lease sites. This will allow the DOE/SCA to continue building seats in districts and neighborhoods where finding property for new construction has proven difficult.

Given the time it takes to design and complete school buildings, many of the capacity projects created by the FY2020-2024 Capital Plan will open over the next several years.

- September 2024: 11,010
- September 2025: 6,244
- September 2026: 5,261
- September 2027: 3,773

The table below shows the geographic details of the seats that will be opening through the Capacity program in the coming years.

Borough	School District	Sept. 2024	Sept. 2025	Sept. 2026	Sept. 2027	Total
Manhattan						
	2		275	170		445

New Capacity

The creation of additional capacity is directly connected with the goals of supporting student enrollment growth, achieving class size mandates, and improving sustainability, access, equity, excellence, and resilience. In service of these goals, the DOE/SCA has identified prospective investments by gathering the best possible information about capacity needs in local communities and the available resources in the system to meet those needs as well as adopting the latest planning tools.

This process starts with understanding challenges that can be solved through structural and systematic solutions. Such challenges might include overcrowding, patterns of student

enrollment, and unmet demand for particular types of schools or programs within schools. The City will seek solutions to these challenges first through the resources that already exist within the DOE/SCA. Thus, where the DOE/SCA proposes future investment in this Plan, we do so having assessed our ability to change structures and having concluded that capital investment is the optimal — perhaps only — means by which to address current or future needs.

There are areas where growth is projected to continue or where over-enrollment persists. These are local conditions, requiring a truly local analysis. In creating this Plan, the SCA has analyzed current capacity figures, capacity scheduled to become available over the next several years, long-term enrollment, and housing projections. Additionally, working closely with the DOE, the SCA is part of the effort to further assess space usage building-by-building which we believe will yield a better understanding of challenges such as over-enrollment or desire for more student choices, and solutions which include capital investment or the repurposing of current resources. Conducting this form of localized analysis and planning is both critical and beneficial for us to offer precise support to schools that face complications in meeting class size mandates. As this analysis develops, we will be able to optimize capital resources.

Within the framework of this re-envisioned New Capacity program, projects will be officially listed in the Plan following the identification of a suitable site and the commencement of the school facility's design process. The unallocated funding will then be accessible to neighborhoods and schools where it is determined a capital investment stands as the sole viable solution to solve localized shortage of seats, after the DOE and SCA have undertaken an extensive analysis. This strategic allocation ensures that resources are channeled to where they are most urgently required, thus maximizing the program's effectiveness in meeting the evolving needs of our educational institutions.

The following chart lists the identified and sited projects by district and sub-district. We have also included information in the chart to show the specific districts where D75 seats have been sited.

District	Sub-District	November 2023 Total Funded Need	November 2023 Funded Need (Non-District 75)	November 2023 Funded Need (District 75)	Number of Seats Completed or in Process
2	TRIBECA / VILLAGE	433	433	0	433
2	CHELSEA / MIDTOWN WEST*	686	686	0	686

Remaining Site Acquisition Costs**												\$600.00	
Grand Total Including Site Acquisition												\$3,442.87	

*Districts that include seats funded for design in this Plan and construction in the next Plan.

**Includes site acquisition costs for all capacity projects.

Notes: Number of projects may vary depending upon availability and configuration of sites and appropriate leased spaces.

All dollar amounts are represented in millions.

Excludes \$682.13 mm for potential site specific/environmental/code cost.

Capacity to Support Removal of Temporary Structures

**Five-Year
Proposal**
\$200.0 mm

The effort to remove transportable classroom units (TCUs) began in 2013 and continues to be a major focus of the DOE/SCA. We are expanding this program to include all other temporary structures in this proposed Plan. Many temporary structures cannot be removed unless additional capacity is built because schools are overcrowded. This program funds the construction of additional capacity in order to remove those temporary structures where students are currently receiving instruction.

Temporary Structure Removal/Playground Redevelopment

**Five-Year
Proposal**
\$50.0 mm

The DOE/SCA will continue its commitment to remove 73 remaining Transportable Classroom Units as well as 54 other temporary structures across the City. Presently, 47 of the remaining 73 TCUs are undergoing removal efforts, and we are in ongoing collaboration with the DOE to strategize the removal of the final 26 TCUs. Eleven of the 54 other temporary structures are in the process of being removed while we work on finalizing plans to remove the rest. After the temporary structures are removed, schools will receive brand-new playgrounds to enhance outdoor recreational space for our students.

Facility Replacement

**Five-Year
Proposal**
\$400.0 mm

The Facility Replacement program, which allocates \$400 million to provide for the development of seats for schools that must be relocated. The seats will be provided through new construction or alternative leasing opportunities, similar to new capacity.

Early Education

**Five-Year
Proposal**
\$200.0 mm

Funding in this category allows for upgrades to certain Early Learn centers as part of the ACS transfer of a number of sites into the DOE's portfolio. The goal is to ensure that our youngest students are learning in quality facilities.

HEALTHY SCHOOLS

Healthy Schools

Introduction

The creation of the new Healthy Schools category demonstrates our commitment to providing students with school buildings that not only support learning, but also considers their well-being. This category combines previously successful efforts such as athletic field improvements and cafeteria enhancements with new efforts to create a more sustainable city by reducing greenhouse gas emissions and creating more environmental educational opportunities.

Electrification

In October 2022, Mayor Adams announced an ambitious plan, Leading the Charge, to start transitioning all New York City schools to operate on electric power. With planned capital funding, the goal is to continue the effort by electrifying existing school buildings. With this substantial investment, the City aims to significantly reduce its carbon footprint and take a major step towards a more environmentally friendly and energy-efficient educational infrastructure.

Heating Plant Upgrades

This program includes funding to facilitate necessary repairs and renovations with the most environmentally friendly energy sources available where electrification is not the optimal option.

Athletic Field Upgrades

One of the most visible upgrades we make to our school infrastructure involves our athletic fields, which provide critical facilities to both schools and communities. Improved facilities provide a safer and more conducive environment for athletes. Second, modernized fields enhance the overall experience for participants, spectators, and the community, fostering a sense of pride and engagement in schools and their teams. Overall, investing in athletic fields yields far-reaching benefits, positively impacting both the school community and the broader neighborhood.

Swimming Pool Upgrades

Investing in renovating and upgrading existing swimming pools to ensure they are operational is crucial for addressing the shortage of swimming facilities in New York City. Many children, especially those in disadvantaged neighborhoods, lack access to proper aquatic education. Pools not only provide safe and accessible places for children to learn how to swim but can also provide critical civic infrastructure for the entire community.

Gymnasium Upgrades

Some of our existing gym facilities need upgrades to better serve their school. Upgrading equipment and improving floors, lighting, and safety measures will greatly enhance the overall fitness experience for students and positively impact students' physical and mental well-being.

Playground Upgrades

**Five-Year
Proposal**
\$60.0mm

Providing children with access to an outdoor play space is essential for their holistic development. It fosters physical activity, social interaction, and imaginative play. Investing in safe and high-quality playgrounds is crucial to promoting a healthier lifestyle from an early age.

Health & Nutrition

**Five-Year
Proposal**
\$30.0mm

Incorporating funding to create unique instructional spaces such as learning gardens is invaluable, as it provides students with hands-on experiences in agriculture, fostering a deeper understanding of food production, sustainability, and environmental stewardship. This experiential learning not only enriches their educational experience but also instills vital life skills and an appreciation for the natural world.

Cafeteria Experience Enhancement

**Five-Year
Proposal**
\$150.0mm

Enhancing the physical condition of cafeterias is crucial in creating an inviting and appealing environment that encourages healthy eating habits among students, ultimately contributing to their overall well-being and academic performance. Allocated funding builds on the successful implementation of this initiative in the prior Plan and will guarantee that students across the city can benefit from these improvements.

CAPITAL INVESTMENT

Capital Investment

Introduction

The Capital Investment category includes two elements — the Capital Improvement Program and School Enhancement Projects. The ongoing capital improvements for existing facilities outlined in the Proposed FY2025-2029 Five-Year Plan demonstrates the DOE/SCA’s commitment to provide safe and comfortable learning environments. While progress has been made in enhancing our school buildings' quality, the sheer scale and age of our building inventory necessitates ongoing investments. The Capital Improvement Program consists of a wide range of construction projects including building exterior and interior upgrades, and system replacements. Complementing this, School Enhancement

projects aim to provide upgrades and enhancements to existing facilities to support modern instructional models.

Capital Improvement Program

The emphasis of the prior capital plans was on exteriors, to safeguard existing buildings from water infiltration, and interior improvements. Because of the size and age of our inventory, the efforts to safeguard existing buildings from water infiltration will continue, and to the extent our funding allows, additional resources are proposed to fund interior improvements.

This proposed Plan includes a Capital Improvement Program for existing buildings totaling \$3.33 billion. This funding allows the DOE/SCA to address the most critical building elements, those rated “poor” or “fair to poor” by the Building Condition

Assessment Survey (BCAS). A small number of building elements that were rated “fair” but have deficiencies that may adversely impact life safety or the structure of the building will also be included.

Capital Improvement Program Overview

Program	Five-Year Proposal
Exterior	\$2,721.0 mm
Interior	\$381.0mm
Other	\$230.0 mm
TOTAL	\$3,332.0 mm

Exteriors

Water infiltration is the single greatest cause of accelerated deterioration of existing facilities. The costs stemming from water infiltration include measures needed to correct damage to interior walls, floors, and ceilings. It also includes related asbestos and lead abatement. For that reason, the prior Five-Year Plans focused on making schools watertight. This Plan continues that important effort.

The major components of the building exterior are roofs, parapets, windows, and masonry. If the BCAS ratings for any building indicated that any of these four major components were in “poor” or “fair to poor” condition, then most of the

other major exterior components rated “fair” or worse will be included in the project. The proposed funding for exterior components is summarized below.

Exteriors Overview

Program	Five-Year Proposal
Flood Elimination	\$850.0 mm
Reinforcing Support Elements	\$20.0 mm
Roofs	\$540.8 mm
Parapets	\$381.7 mm
Exterior Masonry	\$640.5 mm
Windows	\$288.0 mm
TOTAL	\$2,721.0 mm

Interiors

Components of the interior program include electrical upgrades, plumbing, low-voltage electrical systems, and mechanical systems that need to be replaced rather than repaired based on age, condition, and future ability to maintain. In this Plan, funding will be used to replace antiquated fire alarms, install building-wide public address systems, and upgrade interior spaces.

Interior work in occupied buildings continues to be one of our most challenging undertakings. The SCA has developed extensive protocols to perform the most intrusive work over the summer months, schedule work after normal school hours

during the school year, and work closely with the school communities to schedule work during holidays. This ensures the safety of our students and teachers and minimizes the disruption to instructional programs.

The major interior systems addressed are summarized below:

Interiors Overview

Program	Five-Year Proposal
Low-Voltage Electrical System	\$110.0 mm
Interior Spaces	\$11.0 mm
Floors	\$10.0 mm
Ventilation	\$250.0 mm
TOTAL	\$381.0 mm

School Enhancement Projects

Introduction

This allocation supports technological improvements; reconfiguration of current facilities to align with instructional requirements; restroom modernization; science lab upgrades; accessibility enhancements; the Innovative, Diverse, Equitable, Accessible (IDEAS) initiative; the Career and Technical Education (CTE) program; and additional essential upgrades.

School Enhancement Overview

Program	Five-Year Proposal
Facility Enhancements	\$1,630.0 mm
Technology	\$1,252.0 mm
TOTAL	\$2,882.0 mm

Facility Enhancements

**Five-Year
Proposal**
\$1,630.0 mm

The Facilities Enhancement program funds upgrades to interior spaces. This initiative works in conjunction with new capacity investments to enhance learning environments, meet schools’ needs, utilize space effectively, and ultimately elevate student achievement. Projects include improvements to science labs, libraries, auditoriums, bathrooms, and physical fitness facilities. The Facilities Enhancement program also upgrades safety and security systems and expands the functional accessibility of our facilities.

Facility Enhancements Overview

Program	Five-Year Proposal
Accessibility	\$800.0 mm
Facility Restructuring	\$250.0 mm
Safety & Security	\$150.0 mm
IDEAS: Innovative, Diverse, Equitable, Accessible Spaces	\$100.0 mm
Kitchen Upgrades	\$75.0 mm
Career-Connected Learning Infrastructure	\$75.0 mm
Bathroom Upgrades	\$60.0 mm
Elevators	\$50.0 mm
Science Lab Upgrades	\$40.0 mm
Library Upgrades	\$15.0 mm
Auditorium Upgrades	\$15.0 mm
TOTAL	\$1,630.0 mm

Accessibility

The DOE/SCA strives to offer access to a range of programs in buildings for students with mobility impairments and other physical disabilities. Building on prior Plans, the City has increased the funding for this program again to accelerate the creation of additional accessible options throughout the City while continuing to upgrade our existing partially accessible buildings. Partial accessibility renovations include widening partitions and doors; making public assembly spaces ADA compliant; creating accessible bathrooms; and installing wheelchair lifts, ramps, and automatic door openers. Projects are selected to ensure equity across school districts by the DOE/SCA’s Accessibility Committee which is a cross-functional

committee that includes the Space Management and District Planning Offices, Office of Accessibility, Division of School Facilities, Office of Student Enrollment, Division of Specialized Instruction, Office of the General Counsel, and the School Construction Authority.

Facility Restructuring

The Facility Restructuring program funds interior renovations to improve building environments and enhance instructional offerings at schools. As schools' needs change over time, adjustments to existing spaces can be made to more effectively utilize building resources and optimize learning environments. The restructuring of existing buildings includes conversion of extra-large classrooms to create more capacity.

Safety and Security

The Safety and Security Program provides schools with state-of-the-art security technology as a key component of the comprehensive strategy to promote and sustain a climate of safety in all New York City public schools. Enhancements have been implemented through prior capital plans in the areas of network-based video surveillance and metal detection as well as the new Safer Access program initiated in FY 2024 to install a School Entry Locking and Emergency Notification System in all school buildings.

In the proposed plan for 2025-2029, the DOE/SCA will continue installing Internet Protocol Digital Video Surveillance (IPDVS). The IPDVS application allows authorized school officials to view live and archived camera images directly on their computer stations and provides remote viewing capability to authorized personnel from borough and central offices. As of October 1, 2023, this application has been successfully implemented in 813 buildings with more than 36,000 cameras online and an additional 273 buildings in the design and construction pipeline for completion by 2025.

The proposed plan would allocate sufficient funding to provide IPDVS to almost all remaining eligible school buildings for completion by the beginning of the 2026-2027 school year. The IPDVS projects include seamless integration of the security intercom cameras installed as part of the Safer Access program. In addition, an estimated 190 sites that had camera systems installed between 2010 and 2012 will receive a complete technical refresh, including the replacement of their current cameras that are no longer supportable with the latest digital cameras that provide much greater resolution and viewing clarity than those previously deployed.

IDEAS: Innovative, Diverse, Equitable, Accessible Spaces

**Five-Year
Proposal**
\$100.0 mm

This program category will continue to foster the creation of dynamic and innovative learning spaces in ways that empower communities; showcase students' voices; encourage new partnerships; and advance diversity, integration, and inclusion. These efforts will further support the DOE's work to educate through equity and excellence by providing access to 21st century learning opportunities to more students across New York City.

Kitchen Upgrades

**Five-Year
Proposal**
\$75.0 mm

Upgrades to kitchen facilities provide school food staff with new equipment, such as walk-in refrigerators and freezers, and air conditioning in kitchen areas to offer a more comfortable working environment for school food staff.

Career-Connected Learning Infrastructure

**Five-Year
Proposal**
\$75.0 mm

Investing in Career-Connected Learning Infrastructure is critical for expanding educational opportunities and equipping students with practical, job-specific skills to help them be prepared for future careers. Additionally, investment in Career-Connected Learning Infrastructure promotes inclusivity and equity. It provides a valuable alternative for students who may not thrive in a traditional academic setting, ensuring that all learners have access to meaningful educational pathways. As technology advances and industries transform, there is an increasing need for workers with specialized skills. By investing early in a student's educational

journey, we prepare them to enter the workforce with a competitive edge to meet the demands of a dynamic and rapidly changing job market.

Bathroom Upgrades

**Five-Year
Proposal**
\$60.0 mm

As our large inventory of buildings ages, the need to upgrade certain facilities within our buildings becomes more pressing, and bathroom upgrades are frequently requested by the school community. Although bathrooms are functional, some may be outdated. Under this proposed Plan, we will continue efforts to upgrade student bathrooms.

Elevators

**Five-Year
Proposal**
\$50.0 mm

These funds are dedicated to repairing, upgrading, and modernizing elevators. This not only keeps them in good working order, but also ensures all students and staff can easily access each floor of tall, multi-story school buildings.

Science Lab Upgrades

**Five-Year
Proposal**
\$40.0 mm

One of the DOE/SCA's priorities is to provide quality instructional space for science classes. Funding dedicated in prior Plans significantly increased access to science labs for students across the city. This Plan will continue efforts to improve science labs in schools.

Library Upgrades

Libraries play a crucial role in fostering a love of reading and offer access to a diverse range of educational resources. Capital investment to maintain and modernize school libraries is important for student academic achievement and development.

Auditorium Upgrades

Auditoriums are an important part of schools and serve as a versatile space for not only school assemblies and ceremonies but also play host to cultural events, theatrical productions, concerts, and community meetings. These gatherings foster a sense of belonging and provide valuable opportunities for artistic expression, skill development, and collective enrichment. This program will continue prior efforts to upgrade and improve these spaces.

Technology Enhancements

Introduction

The FY 2020-2024 five-year technology plan funded a wide range of programs to increase the technological capacity of schools including: increasing bandwidth, procuring mobile devices for students, creating a disaster recovery data center, upgrading the primary data center, and replacing several legacy application systems.

The proposed FY 2025-2029 Capital Plan builds on the work done in the prior plan and will fund further bandwidth increases and investments to replace outdated telephone systems. It also funds upgrades to the DOE's data security tools, replacement of additional legacy application systems,

and purchase of student mobile devices for high-priority needs.

The DOE has significantly increased the number of wireless-enabled devices available to students. Over one million devices connect to the DOE's network, and this number is expected to grow as more students and teachers access online resources. Additionally, the bandwidth in school buildings should meet the Federal Communications Commission's E-Rate Modernization Order, which recommends a bandwidth allocation of 1 Gbps per 1,000 students. To achieve this standard, the DOE/SCA will continue to invest in the necessary network infrastructure and wireless technology to create a resilient, scalable, and robust core network that enables schools to meet the instructional needs of students and supports future digital education goals.

The DOE plans to use fifty-six percent of the overall program funding to refresh core data network infrastructure at schools. This upgrade includes data network infrastructure and wireless access points that allow more concurrent connectivity at much higher speeds and improved bandwidth. The modern classroom has become an "always connected learning atmosphere," and these upgrades will support current and future technology challenges and initiatives. One such upcoming need is supporting the transition to the New York State online assessment by ensuring higher connection speeds with intensive concurrent users. New York State's Smart Schools Bond Act will support the cost to modernize the infrastructure backbone of public-school buildings and purchase classroom technology including laptops, tablets, and desktops throughout the five boroughs. This will afford students more access to educational applications aimed at differentiated instruction and blended learning programs. Supporting digital learning and teaching initiatives requires our school buildings to have the ability to accommodate the ancillary devices and components that allow students and educators to connect to the internet and/or servers where digital resources reside. The DOE/SCA will also purchase and install equipment to properly cool and secure the network infrastructure equipment in more than 300 school buildings.

Twenty-two percent of the plan is allocated to replacing obsolete, unsupported, and end-of-life telephone systems in 800 schools that no longer provide the functionality needed to support day-to-day operations. Transitioning to voice over IP telephony using schools' upgraded data networks will reduce tax levy costs for the DOE and modernize telephone services. Replacing these outdated phone systems will improve call capacity, improve the user experience, reduce the frequency of school-wide or partial outages, address current safety concerns, and improve system reliability. These new telephone systems will further foster collaboration and communication among school administrative staff, teachers, and parents.

Five percent of the plan is dedicated to enhancing network security so that our students can access the internet and other instructional content safely and securely. These upgrades will enable us to identify, remediate, and mitigate threats to our users and devices; and improve the security posture of our cloud services by protecting them from cyber threats and data breaches. We also will monitor and analyze security data from various sources to detect and respond to potential threats in real-time, and consolidate and preserve this data for analysis and use in incident response investigations.

Five percent of the program allocation will fund acquiring devices for students. This will allow schools to obtain centrally-funded devices for students with high-priority needs to ensure these students are connected to digital resources anywhere and anytime.

The remaining twelve percent of funding will be used to replace critical, legacy applications that help administrators support the goals and efforts of students and educators. These upgrades will improve the DOE's

existing finance systems, human resources systems, payroll systems, and other enterprise applications that will help the DOE meet critical operational needs.

Technology Enhancements Overview

Enhancement	Five-Year Proposal
Classroom Connectivity Universal (CCU)	\$675.0 mm
MDF Upgrades	\$25.0 mm
Telephone Upgrade (Voice over IP)	\$280.0 mm
Data Security Tools	\$42.0 mm
Advanced Network Routing	\$24.0 mm
Fund 20K Devices per Year	\$58.0 mm
Finance Systems	\$70.0 mm
Human Resources and Payroll Systems	\$50.0 mm
Other Enterprise Applications	\$28.0 mm
TOTAL	\$1,252.0 mm

MANDATED

Photo credit: Etienne Frossard

Mandated

Introduction

This category encompasses a number of items including asbestos remediation, lead paint abatement, and other projects required by local law or City agency mandates. It also includes funding for building condition surveys, code compliance, and insurance.

Mandated Programs Overview

Enhancement	Proposed Amendment
Asbestos Remediation	\$250.0 mm
Lead Paint Removal	\$10.0 mm
Code Compliance	\$332.0 mm
Building Condition Surveys	\$100.0 mm
Wrap-Up Insurance	\$900.0 mm
Prior Plan Completion	\$1,076.6 mm
Emergency, Unspecified & Miscellaneous	\$726.4 mm
TOTAL	\$3,395.0 mm

Asbestos Abatement

The DOE/SCA’s Asbestos Abatement program is federally mandated by the Asbestos Hazard Emergency Response Act (AHERA) of 1986. The Act requires that every public and private school building be inspected once every three years. The location of any asbestos must be documented and a plan developed for the continuous management of the asbestos in the building.

Asbestos abatement removes the potential health hazard presented by airborne asbestos fibers. Asbestos is found most commonly in schools in pipe and boiler insulation, plaster, floor tiles, and spray-on insulation. Only asbestos in a loosely

bound or “friable” condition is dangerous and must be removed. Asbestos must be removed from construction areas prior to being disturbed during construction or maintenance activities.

The cost of asbestos abatement is included in the individual project costs for building modernizations and individual interior and exterior upgrades where asbestos is present. This funding category provides for abatement of disturbed asbestos in buildings where no related major capital projects are planned.

Lead Abatement

Lead paint abatement is mandated by the U.S. Environmental Protection Agency (EPA) and New York City Department of Health and Mental Hygiene (DOHMH) regulations. The targeted population includes Pre-Kindergarten, Kindergarten, day care in schools, special education, and first grade students. The DOE/SCA continues to remediate areas identified by lead inspections and DOHMH referrals.

Lead abatement is included as an integral part of individual capital projects that affect surfaces that may contain lead paint, e.g., window replacements and paint removal from exterior walls prior to re-pointing. This proposed funding

provides for lead paint abatement in buildings where no related major capital projects are planned.

Compliance with NYC Building Code and other City Agency Regulations

This category is an ongoing program to bring all school buildings into conformance with safety-related regulations. Although many schools are old enough to predate the New York City Building Code, code requirements relating to life and fire safety systems apply retroactively so that buildings not in compliance must be retrofitted accordingly. DEP requires buildings to have Reduced Pressure Zone (RPZ) devices that prevent backflow. Local Law 10 (Owners' Inspection of Building Facades) and its successor legislation, Local Law 11, require that the exterior masonry for buildings over a certain height be inspected every five years. If hazardous conditions are discovered during an inspection, a sidewalk shed must be

installed immediately and plans to make the necessary repairs must be developed. At present, all repairs required by Local Law 10/11 have been completed and a system of ongoing maintenance is in place. As projects are created to address Local Law 11 deficiencies, the cost of those projects will be included under corresponding exterior components. Local Law 14 also applies retroactively and, in general, requires that commercial kitchens, including those in school buildings, have a grease trap installed. A grease trap is a plumbing device designed to intercept and retain grease and solids before they enter the wastewater system. This helps prevent clogs and blockages in the plumbing and sewer systems. The DOE/SCA is also continuing work to bring all school buildings into compliance with the emergency lighting requirements of Local Law 26 which requires that exit signs have their own power source. All school buildings are assessed for compliance with these requirements and necessary upgrades are proposed as needed.

Local Laws 6, 31, 32, 94, and 97 will significantly impact the budget for this and subsequent Plans. Together, these laws raise the standard for green construction by requiring that any projects involving new construction or substantial renovation meet more stringent energy efficiency and green building standards. The costs associated

with these requirements are included in costs for individual categories and are therefore reflected in the Capacity and Capital Investment sections rather than listed here.

Building Condition Surveys

Keeping the baseline data of building conditions in school facilities up to date is essential to the DOE/SCA's ability to program capital improvement projects. The SCA conducts an annual Building Condition Assessment Survey (BCAS) in preparation for the Five-Year Plan and its Amendments.

Wrap-Up Insurance

Since 1990, the SCA has maintained an Owner Controlled Insurance Program (OCIP) that provides insurance coverage for the SCA and contractors and subcontractors working on SCA projects. Rather than the traditional approach of having each contractor and subcontractor procure its own insurance, the SCA negotiates and purchases coverage for Workers Compensation and Employers Liability, General Liability, Excess Liability, and Builder's Risk. The cost of this program is uncertain. The annual cost will depend upon the ultimate loss experienced.

Prior Plan Completion Cost

Many projects funded in the FY2020-2024 Plan will still be in progress during this Five-Year Capital Plan period. Although construction contracts are obligated in the FY2020-2024 Capital Plan, other costs, such as furniture and equipment purchases as well as construction change orders, may occur during the FY2025-2029 Capital Plan period. This category provides the funding to complete these projects after the end of FY2024.

Emergency, Unspecified & Miscellaneous

Any building condition found to be potentially dangerous is immediately referred to the SCA for further evaluation. If necessary, sidewalk bridging is installed to safeguard the community. If any condition needs immediate attention, capital funding from the Plan's Emergency, Unspecified & Miscellaneous allocation will be used to remedy the condition without delay.

This lump sum funding allows the DOE/SCA to respond to emergencies and unforeseeable needs without having to divert funds from other projects. By law, funding allocated from this category cannot exceed five percent of the total

estimated cost of the Five-Year Plan.

FINANCING STRATEGY

Capital Plan Funding

The FY2025-2029 Five-Year Capital Plan is financed primarily by City funds. The DOE/SCA will continue to work with the NYC Educational Construction Fund and its private partners to investigate appropriate financing options to supplement and/or leverage City and State funding over the five-year plan period.

The Plan's total appropriation of \$17.0 billion during its five-year term will support the DOE/SCA's goals of improving educational performance and sustaining its diverse portfolio of existing facilities in a state of good repair. Twenty-nine percent is for the creation of school seats and support of ACS sites.

Thirteen percent of the total funding is allocated to the newly created Healthy Schools category. This allocation is geared towards launching and prioritizing efforts aimed at creating healthy and sustainable school environments that nurture students' academic, physical and mental development and wellness.

Thirty-eight percent of the total funding is targeted toward capital investment in basic facility needs and enhancing school facilities — both system-wide and to support specific instructional programs. These programs include technology improvements, safety enhancements, and other general improvements to learning environments. The remaining 20 percent is dedicated to mandated programs.

To complement Plan funding, both City and State elected officials allocate additional capital funds for specific projects at individual schools. These funds are targeted towards a specific school's needs in areas such as technology, science labs, sports/athletic fields, playgrounds, bathrooms, and other quality-of-life facility upgrades/enhancements. The typical total funding allocated by the City's elected officials ranges from \$100 million to \$200 million annually. Some State elected officials have also sponsored capital projects in individual schools through various grant programs administered by the Dormitory Authority of the State of New York (DASNY) such as the Community Capital Assistance Program (CCAP), New York State Technology and Development Program (NYS TAD), New York State Economic Development Assistance Program (NYS EDAP), and the State and Municipal Facilities Program (SAM). The DOE/SCA greatly appreciates the support of our elected partners whose contributions enable additional enhancements in the buildings throughout the city.

The DOE/SCA will also continue to be diligent in its effort to pursue new federal programs pertaining to financing and funding for school building and technology infrastructure.

FY 2025-2029 FIVE YEAR PLAN AMENDMENT PREPARATION

New Capacity

The New Capacity portion of the Plan is based upon an enormous volume of data that the SCA collects and analyzes each year in order to accurately project when and where additional seats will be needed. This data includes the capacity of existing schools, as well as demographic projections of future student enrollment, including increased demand resulting from projected new housing. Ultimately, if the demand is greater than the supply, the districts and sub-districts are deemed overcrowded.

Current Utilization

The first step in identifying new capacity needs is to assess existing school facilities. The DOE/SCA maintains an inventory of the amount of space and utilization of every DOE/SCA facility. This allows the DOE/SCA to ensure that space is being used efficiently before proposing to spend capital funds on the creation of additional seats.

Each year the SCA conducts a Principals Annual Space Survey (PASS) to update information regarding the size, function, and use of each room in every school building. School principals complete the surveys, which are then analyzed to determine capacity. Building capacity is defined as the maximum number of students who can be accommodated reasonably in a facility without adversely affecting educational services and programs. The utilization rate for each school building is then determined by comparing capacity with actual enrollment figures.

The detailed results of this analysis on a school-by-school basis can be found on the NYC School Construction Authority's website www.nycsca.org in the reports titled "Enrollment, Capacity, Utilization Report," known as the "Blue Book."

Enrollment Projections

The next task in developing the capacity program is to project the future demand for seats. The enrollment projection process entails 128 separate demographic projections, taking into account the unique migration, birth, and enrollment trends in each Community School District. These projections are used to develop total enrollment projections by district, borough, and the city as a whole. Projections are prepared for five and ten years into the future in order to ensure that capital funds are not expended to meet only short-term anomalies in enrollment. For this Proposed Amendment, the projection years were 2025 to 2029.

These demographic projections can be found on the NYC School Construction Authority's website www.nycsca.org in the report entitled "Enrollment Projections 2025 to 2029 New York City Public Schools."

New Capacity Needs Assessment

The enrollment projections for 2024 were used to determine future utilization. This is, in effect, a supply and demand analysis. The future enrollment projections are compared to the existing capacity of seats in school buildings. When demand exceeds supply, additional seats must be provided or overcrowding will result. This analysis was performed below the district level. Areas within each district were analyzed to determine need and recommendations were developed accordingly.

In order to project future utilization accurately, it is necessary to fine-tune the analysis. The cohort survival projection methodology used by the SCA's demographers considers most of the factors that affect enrollment. These factors include migration within the city, in-migration to the city from outside, movement out of the city, births, transfers, long-term absences, and dropouts. However, policy changes and international economic and political events can undo even the best projections. For example, dramatic economic trends or changes in federal immigration policy may result in unforeseeable increases or decreases in enrollment. In addition, new housing

development projects can stress the local schools by introducing an influx of new students. The SCA carefully tracks new housing starts and builds the expected increase in school-age population into projections.

Existing Facilities

Background

Preparation of the Capital Improvement Program begins with a baseline survey of the DOE/SCA's approximately 138,000,000 square feet of space, including school buildings, administrative buildings, leased facilities, annexes, mini-schools, temporary buildings, playgrounds, athletic fields, and field houses.

Methodology

Every year, a detailed visual inspection of each school facility is conducted by a four-person team consisting of two architects, an electrical engineer, and a mechanical engineer. Averaging one school per day, the inspectors visually assess each facility's physical condition. The teams rate each building's main systems and underlying components, identifying and quantifying any deficiencies.

The condition of each building system is assessed in various ways beginning with interviewing building personnel, including the principal(s) and custodian, quantifying the existing deficiencies through a visual inspection, reviewing violation information, and assessing remaining useful life. This assessment is performed at a component level and then the information is combined to present an evaluation of the overall system condition.

After the building deficiencies are identified, a program is used to assign order-of-magnitude costs to repair each deficiency. These data are then grouped into capital projects falling into one of 60 capital planning categories. Once the projects are created, an analysis is conducted to ensure that the project costs reflect the approximate budget necessary to accomplish the repair needed.

Key Steps and Dates for Approval of the Proposed Amendment

November 2023

- Proposed Amendment released

November 2023 – January 2024

- Meet with Community Education Councils and other community representatives

February 2024

- Issue a revised Amendment to the Panel for Educational Policy

March 2024

- Submit Panel-approved proposed Plan to Mayor and City Council

June 2024

- Adoption by City Council
